Re: Corian Kitchen Installation – Duracite Job # 10140900.

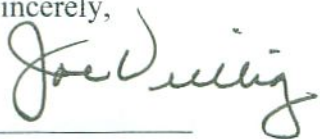

This letter is almost a year late in coming but many things have delayed me.

We purchased a Corian countertop, remodeling our kitchen, from Home Depot in Roseville, CA. In the process we talked with a Duracite office and were impressed with their courteous, efficient handling of the scheduling. On 1/16/08 Toua came with a helper to tear out the ceramic tile countertop and make the templates for the new top. He did a great job, working very hard and efficiently, and cleaned up well after his work. He is to be complimented. Later, on 2/6, the Vang brothers came to install the new countertops. They did an exceptional job of installation and cleanup. They worked very hard and efficiently and had great attitudes. They also are to be complimented.

We were very pleased with the caliber of your employees and the quality of the countertop fabrication.

We have recommended Duracite to others and were very pleased with how the Home Depot personnel in Roseville handled the project.

Sincerely,

Joe Vielbig
